DETAILED ACTION

Claims 19, 20, 22-40 and 42-52 are pending in this application.

Action Summary

The examiner acknowledges the cancellation of claims 21 and 41. Therefore, any and all objections and/or rejections directed to them are hereby withdrawn.

The rejection of claims 19, 20, 22-39 and 49-52 under 35 U.S.C. 112, second paragraph as being indefinite is hereby withdrawn in view of applicants amendment to the claims.

The rejection of claims 40 and 43-47 under 35 U.S.C. 103(a) as being unpatentable over Ajinomoto Co. Inc. is hereby withdrawn in view of applicants amendment to the claims.

Claim Objections

Claim 22 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 22 depends from a cancelled claim. Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants use the phrase "less than or equal to" in the claims when describing the microparticle size. It is unclear to the examiner if it is "less than" or "equal to" are the intended values.

Allowable Subject Matter

Claims 19, 20, 23-30, 32-40 and 42-52 are allowed. The instant invention is directed to a composition comprising a physiologically acceptable medium, at least on alkyl para-hydroxybenzoate, at least one lipophilic amino acid ester and wherein the para-hydroxybenzoate to lipophilic amino acid ester ratio is from 1:20 to 70:30. The closest prior art reference of Ajinomoto Co. Inc. does not teach, suggest or make obvious the ration of the alkyl para-hydroxybenzoate to lipophilic amino acid derivative. Ajinomoto Co. Inc. also does not teach, suggest, or make obvious treating solid particles selected from the group consisting of synthetic mineral fibers, natural mineral fibers, synthetic organic fibers, natural organic fibers and wax dispersions with at least one amino acid ester to prevent the adsorption if the alkyl para-hydroxybenzoate onto the particles.

Conclusion

Claim 22 is objected to and claim 31 is rejected.
